Potomac Park and the Army. The quoting of Lieut. Col. W. H. Arthur, of the Army Medical Corps, as a representative of the War Department engaged in selecting Potomac Park as the site of a new infantry post appears to have been altogether premature. That officer now explains that he expressed the opinion in favor of Potomac Park in a purely personal way, and qualified it "by stating that no such proposition could be seriously considered until a much more careful and complete investigation has been made by engineering Hoke and Joe that it is possible for the fore the regulation of airship rates will experts, as the question of a sewer system would be a difficult one to solve on such a low, flat piece of ground, and there would probably be difficulty in se-both dear charmers away. curing firm foundations for buildings." considering the absorption of Potomac of Hoke hurrah and Joe jubilation-Park in the list of military reservations. It is, as Col. Arthur remarks, ex- that Georgia has about made up its mind ceedingly doubtful whether that tract not to get excited this time! would furnish a suitable abiding place for

any permar nt structures. It would undoubtedly be a good thing if the infantry branch of the army, which is the largest arm of the military establishment, could be represented in Washington by a complete regiment. The absence of infantry here was remarked recently when it became necessary to give a demonstration of the new infantry equipment devised by a board which has been engaged for a year or more in attempting to reduce the burden of the foot soldier. When it came to showing ment generally, it was found necessary to employ enlisted men of the engineers on duty at Washington Barracks,

There is not an infantry command objections to Potomac Park, and public proposition. But it is to be hoped that mud. an infantry post will be established in this vicinity.

A Much-needed Economy.

It is all very well to do what may be done to cut down the operating expenses of the government, but what is needed more than anything else in this era of recognizing defects and correcting them. Weston traveled to the Pacific on his own legs wear large hats for a few short seasons, high prices is something that will cut down the operating expenses of the individual, and it is to this problem, we believe, that the authorities should address themselves. Among the many things that might be done by governmental activity to make the burden of expenses to the common people less, there is nothing that seems quite socobvious as the establishment of a parcels post system. So far as we are aware, there has never been one intelligent or same objection to this. If nothing has been done, it has simply been because the people are indifferent; because the matter has not been urged strongly enough, or because the enormous profits unjustly made by the express companies are not sufficiently well known by the people.

Here is an extract from the Wall Street Journal:

"It looks as if the Wells-Fargo stockargument against a parcels post, and yet factors of military activity. the consumer remains ungrateful."

When John Wanamaker was Postmaster General, twenty years ago, he de- cent of the people who die in that town or sacrifice are pleasing to God. clared that there were four arguments go straight to hades. Well, if one must against the parcels post system, and he go to hades, life in Chicago would seem ing Life, in all and through all and movenumerated them as follows: The Adams to be fine preliminary training.
